DETAILED ACTION

Claim Rejections - 35 USC § 112

Claims 1-8 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

According to Claim 1 an organic dye molecule links with two molecules of chromophore D. However, in Claims 5, 6 and Example 3 of Specification the Applicant teaches that chromophore D directly connects to polyamide main chain.

In addition, in Claim 2 groups R and R' denote as carbonyl and ester groups. However, based on the structural formula those groups are monovalent, whereas ester and carbonyl are divalent groups.

Claim 1-8 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

The prior art search for the Dye component (Claim 1) shows that the structure of the Dye is novel. Therefore, there is no prior art rejection for this Application.
